

## Oliver Pearce, Principal, Pöyry Management Consulting

Oliver Pearce is a Principal with Pöyry Management Consulting. He has over 10 years' experience in the industry. He has been based in the UK, Nordics and South East Asia.

Oliver leads projects that evaluate the impact of future market evolutions for current decision making. Oliver has worked for utilities, regulators, governments, TSOs, energy associations, energy intensive industry, project developers and financial institutions. Topics have covered market design and analysis, feasibility studies, valuations, due diligence, market entry studies and strategies, policy and regulation.

Most recently, Oliver was project manager of Pöyry's Nordic Market Design forum, a multi-client study for utilities, TSOs and energy associations. The study identified and tested the feasibility of changes to the Nordic market design that can be implemented before 2020 with a visible impact by 2025. The study involved ministries as observers and significant interaction with regulators and other stakeholders.

In the Baltics Oliver has worked on proposals for common imbalance settlement rules for the Baltic TSOs and led a project for Elering on DSR as a source of flexibility. He also led the Baltic energy scenarios of Pöyry's Nordic-Baltic 2050 multi-client study.

Oliver has a MEng in Engineering and a PhD in Systems from City, University of London
